

RCOphth Annual Congress 2018

Headaches for ophthalmologists

Monday 21 May 2018 11.00 – 12.00

**Chaired by Dr Alexandra Sinclair, Neurology Consultant and Clinician Scientist
University of Birmingham and University Hospital Birmingham NHS Foundation Trust**

Ophthalmologists are often the first to evaluate patients with headaches, eye pain and headache-associated visual disturbances. Distinguishing benign headaches from those associated with neurological and medical emergencies can be challenging. This intensive symposium will provide the practicing Ophthalmologist with a comprehensive and up-to-date practical guide in the diagnosis and management of headache disorders that may present to the ophthalmologist.

11.00 – 11.20 Headaches in the emergency room and how they may present to the ophthalmologist

Dr Brendan Davies, Consultant Neurologist, University Hospitals of North Midlands NHS Trust

11.20 – 11.35 Eye pain & headaches when the eye exam is normal: from Trigeminal Autonomic cephalalgias to migraine and trigeminal neuralgias

Dr Anita Krishnan, Consultant Neurologist, The Walton Centre NHS Foundation Trust

11.40 – 12.00 Headaches with visual disturbance

Miss Susan Mollan, Consultant ophthalmologist, University Hospital Birmingham NHS Foundation Trust
