# 1 Summary

---

The part 2 Fellowship of the Royal College of Ophthalmologists (FRCOphth) oral examination consists of two elements. The objective structured clinical examination (OSCE) consists of six stations worth a total of 198 marks, whilst the structured viva consists of five stations worth a total of 120 marks. One of the OSCE stations is conducted with the vivas.

A total of 16 candidates sat the examination.

The pass mark for the structured viva was 76 and the pass mark for the OSCE was 131.

The reliability of the oral examination was 0.887 (Viva) and 0.721 (OSCE).

The pass rates for the viva and the OSCE were 11/16 (68.8 per cent) and 13/16 (81.3 per cent) respectively. The overall pass rate was 12/16 (75 per cent).

## 2 Standard Setting

---

### 2.1 Hofstee method

After the examination, examiners were asked to review the parameters for the standard setting based upon their judgment of the difficulty of the stations. The following values were used to set the pass mark:

- The maximum credible pass mark for the examination = 65%
- The minimum credible pass mark for the examination = 55%
- The maximum credible pass rate for the examination = 100%
- The minimum credible pass rate for the examination = 55% (Viva) 45% (OSCE)

The cumulative fail rate as a function of the pass mark and the co-ordinates derived from the four values above were plotted on a graph. The point where a line joining the two coordinates intersects the cumulative function curve is used to identify the pass mark.

Plots visualising this process for each part of the examination are shown in the relevant sections below.

## 3 The structured vivas

---

There were five structured vivas, which were held on Monday 29<sup>th</sup> November 2023. The communication skills OSCE station was conducted as one of the viva stations, making six stations in all (the OSCE station is not included in the analysis of the viva; it is merely administered at the same time). Each viva lasted 10 minutes. The viva stations were:

- Station 1: Patient investigations and data interpretation
- Station 2: Patient management 1
- Station 3: Patient management 2
- Station 4: Attitudes, ethics and responsibilities.
- Station 5: Audit, research and EBM and Health promotion and disease prevention

### 3.1 Results

Maximum mark (five stations, 10 examiners (2 per station), 24 marks per station): 120

## 4 The objective structured clinical examination (OSCE)

---

There were six OSCE stations in all. The five clinical stations were held on different days to the Vivas (OSCE Station 6 held with the vivas). The OSCE stations were:

- Station 1:** Anterior Segment
- Station 2:** Glaucoma and Lid
- Station 3:** Posterior Segment
- Station 4:** Strabismus and Orbit
- Station 5:** Neuro-ophthalmology
- Station 6:** Communication Skills (takes place logistically with viva aspect of the exam)

## 5 Overall results for the oral examination

### 5.1 Results

Table 11: Overall results summary

Statistics	Value	Percentage
Pass Mark	207/318	65.1%
Mean	225.7/318	71%
Median	229.5/318	72.2%
Range	169 – 265	53.1% - 82.3%

To pass the oral examination candidates had to either:

- i) pass both the viva (76/120 (63.3%)) and OSCE (131/198 (66.2%)) or
- ii) pass the OSCE, achieve 71.3/120 (59.4%) in the viva, and achieve  $\geq 207/318$  (65.1% overall).

Overall, 12 out of 16 candidates passed the Part 2 Oral examination this diet.
