

Tuesday 19 May 11.30 – 12.30 Emergencies of the orbit and adnexa: Recognition and multidisciplinary management

This symposium will provide a comprehensive overview of emergencies affecting the orbit and adnexa, covering life- and sight-threatening conditions including infective orbital cellulitis and mucormycosis, non-infective inflammatory and tumour-related emergencies, adnexal and soft tissue injuries, and orbital trauma. Delegates will gain practical knowledge of red flag signs, diagnostic approaches, and evidence-based emergency interventions to improve clinical outcomes.

11.30 – 11.45 Orbital and Adnexal Infective Emergencies

Mr Vikas Chadha, Glasgow Royal Infirmary

11.45 – 12.00 Non-infective Inflammatory and Tumour-related Emergencies

Mr Prashant Oberoi, Nottingham University Hospitals NHS Trust

12.00 – 12.15 Emergencies in Soft Tissue and Adnexal Injury

Miss Rebecca Ford, Bristol Eye Hospital

12.15 – 12.30 Emergencies in Orbital Trauma

Miss Varsha Backiavathy, Sankara Nethralaya, Chennai. India
